The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/023,259	<b>Applicant(s)</b> PARK ET AL.	
	<b>Examiner</b> CATHERINE N. WITCZAK	<b>Art Unit</b> 3767	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/14/2008 has been entered.

### ***Response to Arguments***

The indicated allowability of the claims is withdrawn in view of the newly discovered reference(s) to Arias et al and Dalton et al. Rejections based on the newly cited reference(s) follow.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-6 and 22-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Arias et al (US 2002/0133129).

Arias et al disclose a device comprising a plurality of microneedles having length between 10 and 500 microns and widths between 10 and 500 microns (paragraph 0089) extending from a substrate formed of a first and second material, wherein the second material forms a portion of the microneedle and

enhances the mechanical strength of the microneedle compared to microneedles formed without the second material (wherein it is the Examiner's opinion that it is inherent that any device comprising an additional second material will increase that device's strength compared to that when the device is only made of the one material); the first or second material being polyurethane (paragraph 0127), an non-biodegradable polymer (polydimethylsiloxene - paragraph 0076), or a metal (paragraph 0054).

2. Claims 1, 7-9 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Dalton et al (US 2005/0197308).

Dalton et al disclose a device comprising a plurality of microneedles formed of a first and second material, wherein the second material forms a portion of the microneedle and enhances the mechanical strength of the microneedle compared to microneedles formed without the second material (wherein it is the Examiner's opinion that it is inherent that any device comprising an additional second material will increase that device's strength compared to that when the device is only made of the one material); wherein the second material is a vaccine which is released from the microneedle (abstract).
